DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks on pages 8-29, filed on October 28, 2005, have been fully considered and are persuasive. The objection of claims 27-28 has been withdrawn.

Allowable Subject Matter

2. Claims 23-26, 29-30 and 32 are allowed and re-numbered as 1-7.

3. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method of processing data from at least two sensor array to determine the track of a target, each sensor array having at least two sensors, the sensor arrays being arranged non-parallel to each other as disclosed in claims 1, 30 and 32. The claimed invention distinguishes over the prior art by the manner in which the integrands are added resulting from the integrating in the primary and secondary correlograms. The claimed combination allows for improving a method of tracking of a target.

This type of method for tracking of a target is conventional. However, the prior art of record fails to teach calculating as associated delay curve in a primary and secondary correlograms for the sensor array, accumulating data for the reference track by integrating a series of pixel values along the appropriate delay curve in the primary and secondary correlograms and adding integrands resulting from the integrating in the primary and secondary correlograms. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims 24-26 and 29 are allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
